

MAKE A MINI TAPESTRY HANG IT ON YOUR WALL

1

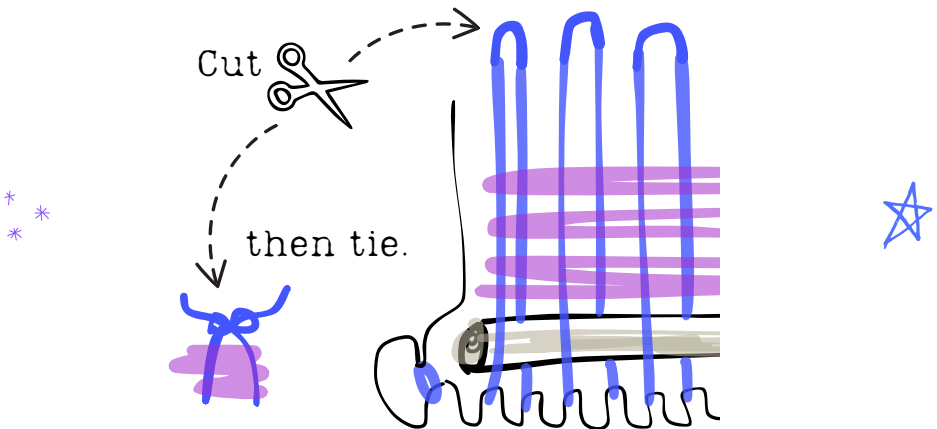

Begin the weaving with the dowel as the first row, at the bottom
Begin the next row with your yarn.

Leave the ends of your warp thread long.
You'll use them to hang it when it's done.

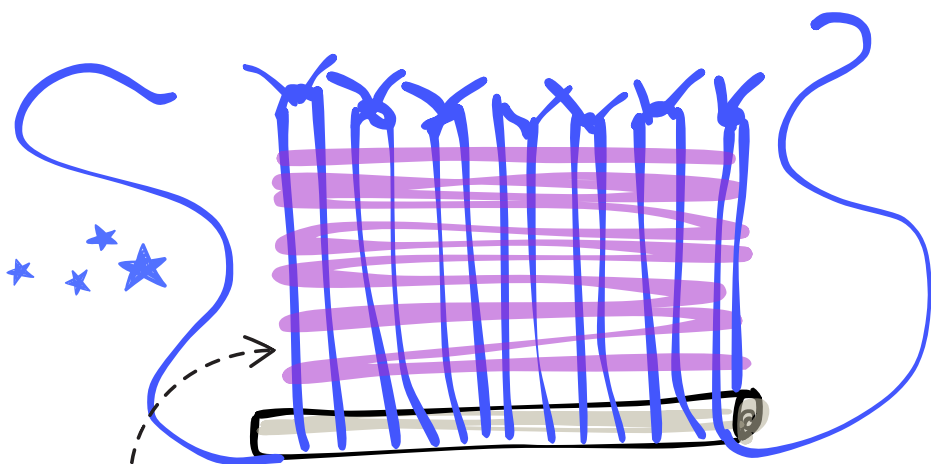

2

When you're finished weaving,
remove each top loop from its tooth
one at a time, and cut it at the top of
the loop. Then tie the ends in a double
knot, snugly against the weaving.
Repeat with every top loop.

3

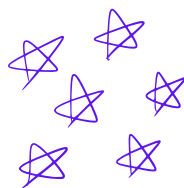

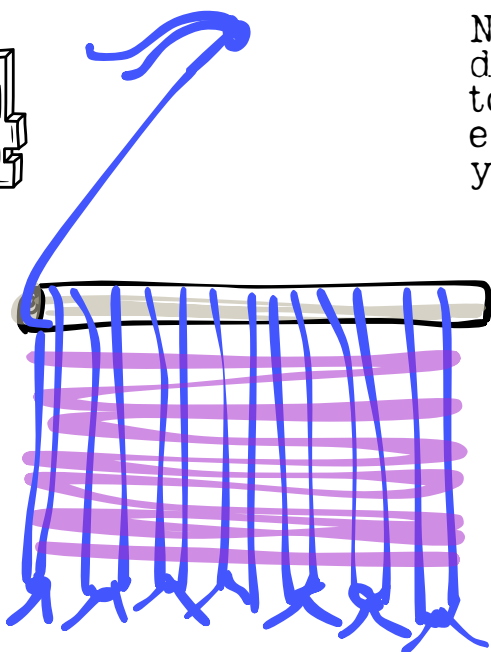

When all your loops are cut and tied, unwind the warp thread from the keeper slots at the bottom. Remove the weaving from the loom.

You can push the yarn down against the dowel a bit so the dowel isn't loose.

4

Now! Flip it so the dowel is at the top. Tie those long ends together so you can hang it.
